EDUCATION

George Mason University

B.S. Information Technology, Cybersecurity Concentration

Fairfax, VA

TECHNICAL SKILLS

Languages & Scripting: Python, Java, JavaScript, SQL, HTML, CSS, Linux CLI,

Cybersecurity: SIEM, IDS/IPS, Vulnerability Assessment, Threat Analysis, Digital Forensics, Incident Response

Tools & Platforms: Kali Linux, Wireshark, Metasploit, VS Code, Git, Google Workspace

Concepts: Network Security, File System Internals, Data Recovery, Binary Analysis, AI/ML Automation, Prompt Engineering

Spoken Languages: English, Bengali, Hindi, Urdu

PROJECTS

AI-Powered Resume Analyzer — Python · NLP · Keyword Extraction · Decision Support

- Architected a Python NLP pipeline to parse resumes and score alignment against job descriptions using keyword extraction and cosine similarity algorithms, automating candidate screening logic
- Generated structured compatibility reports with actionable recommendations, demonstrating applied experience in AI-driven automation and intelligent data processing.

Career Command Center — HTML · CSS · JavaScript · AI Integration · 2025

- Designed and built an interactive career portfolio and resume dashboard from scratch; features a live AI-powered resume analyzer that scores job description alignment, generates keyword-optimized tailored resumes, and exports downloadable PDFs

Certification

Google Cybersecurity Professional Certificate — SIEM, IDS/IPS, Vulnerability Assessment, Python, Linux, SQL

EXPERIENCE

Burlington Stores, Inc | Retail Associate

2025 – 2025

- Operated and troubleshooted POS terminal hardware and payment processing software; diagnosed hardware faults, performed system resets, and escalated persistent issues to reduce transaction downtime.
- Utilized enterprise inventory management systems to perform real-time stock audits, data entry, and compliance checks, maintaining data accuracy across product databases.

Food Lion | Customer Lead

2023 – Present

- Operated RF handheld scanning devices and barcode systems to conduct real-time inventory audits, price verification, and automated reorder triggering within store management software.
- Identified, triaged, and escalated self-checkout kiosk hardware and software malfunctions to IT personnel, documenting fault patterns to support recurring issue resolution.

NOVA Parks | Supervisor

2022 – 2024

- Administered POS systems, digital scheduling platforms, and cloud-based reservation software; resolved technical issues and coordinated with IT to maintain system uptime and data integrity.
- Trained staff on digital workflow tools including scheduling software and communication platforms, reducing operational errors through standardized system usage protocols.

Tutor.com | Online Tutor

2021 – 2024

- Delivered 2,000+ hours of technical instruction via LMS platforms and remote collaboration tools including screen sharing, virtual whiteboards, and real-time co-editing environments.
- Supported students in Python, SQL, and math coursework — reinforcing technical communication and problem-solving skills directly applicable to IT help desk and support roles.

ACTIVITIES

Robotics — Engineered robotic systems with microcontrollers, embedded sensors, and motor drivers; competed in events focused on real-time autonomous control and hardware-software integration.
